FEATURED WORK

YOMA CONNECT 2023–24

HR platform, 8,000+ daily users. Biometric auth API, payroll, leave & attendance modules.

HMM POS (SaaS) 2022–23

Full-stack SaaS POS: barcode scanning, invoicing, P&L tracking, hold-and-resume feature.

LMS (DDD) 2024

Learning Management System built with Domain Driven Design. H5P interactive content, multi-role access.

DESIGN DEN 2024

Document management for interior designers. Customer portal, quotations, e-signatures.

EDUCATION

UNIVERSITY OF COMPUTER STUDIES, LOIKAW

B.Sc., Computer Science
Myanmar · Dec 2017 – Dec 2022

TECHNICAL SKILLS

BACKEND

PHP Laravel GraphQL REST APIs DDD
TDD

KEY METRICS

4+ Years of Production Experience
8,000+ Daily Active Users Served
200h/mo Saved via Automation
99.9% Uptime Maintained

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 4+ years building production systems across web, mobile, and AI. Shipped platforms serving 8,000+ daily users using Laravel, Vue.js, React, and GraphQL. Currently leveraging AI-powered development tools (Claude Code, Cursor, GitHub Copilot, Codex) to accelerate product delivery. Proven ability to own products end-to-end — from architecture and DDD to deployment and CI/CD.

EXPERIENCE

Leap Technology (Remote, Singapore)

Software Engineer

May 2024 – Present

Remote · Singapore

- Architected a Learning Management System using Laravel, Vue.js, and Domain Driven Design with full test coverage — integrating H5P for interactive quizzes and games across Student, Teacher, and Admin roles.
- Built a no-code page builder enabling non-technical admins to customize landing pages, plus a robust role/permission system for SuperAdmin, Staff, and Organization tiers.
- Delivered Design Den, a document management platform for interior designers — quotation generation, variation orders, customer e-signature portal, and activity audit logging.

Onenex

Software Engineer

Oct 2023 – May 2024

Yangon, Myanmar

- Enhanced Yoma Connect, Myanmar's leading HR platform (8,000+ DAU), shipping modules for onboarding, payroll, leave management, attendance, and overtime using Laravel, NuxtJS, and GraphQL.
- Developed a Biometric Authentication API for mobile, strengthening security and reducing clock-in friction for thousands of daily employees.
- Built real-time HR dashboards (leave, attendance, birthdays, anniversaries) and a comprehensive user activity log for compliance and auditing.

Host Myanmar

Junior Software Developer

Feb 2022 – Sep 2023

Yangon, Myanmar

- Developed HMM POS, a SaaS Point-of-Sale with Laravel + Vue.js — two-click checkout, barcode scanning, dynamic cart, automated invoicing, and profit/loss analytics used by multiple merchants.
- Engineered a transaction hold-and-resume feature, allowing cashiers to serve multiple customers simultaneously — reducing wait times and improving throughput.
- Built Tyre78 POS (mobile APIs + admin panel) and a Library Management System with role-based access and librarian notification workflows.

AI INTEGRATION & FREELANCE

Independent / Upwork

Freelance Software Engineer & AI Builder

2024 – Present

Bangkok, Thailand

- Ship AI-augmented web applications using Claude Code, Cursor, and GitHub Copilot — accelerating development velocity by embedding AI into the core engineering workflow, not just prototyping.
- Automated repetitive infrastructure and deployment tasks, saving an estimated 200+ hours/month for client teams through CI/CD pipelines, server provisioning, and monitoring setups.
- Delivered end-to-end freelance projects spanning web apps, admin dashboards, and API integrations — maintaining 99.9% uptime across client production systems.
